Built to be **tough.**
Made to be **easy.**

Built to be **tough**. Made to be **easy**.

It began a half century ago in Saint Paul, Minnesota. Back then, we made products for the military that were reliable, durable and easy to use. These products were built to be tough, made to be easy. Since that time our product line has evolved, but our commitment to these standards, created long ago, has remained the same.

Throughout the '80s and '90s, Nobles grew into a market leader, with the most easy-to-use, innovative and well-built cleaning machines in the industry. The designs were simple, and well engineered, with what was at that time, the new concept of extensive use of rotomold polyethylene housings. It was unbeatable.

Today, our products are still built to be tough, made to be easy. This tradition is the driving force that's guided us through every decision we've made and every machine we've built. It's our legacy, and it's not something we're about to change.

No-nonsense scrubbers. For no-nonsense jobs.

Scrubbing Innovations

Tennant Company's industry-changing scrubbing technologies offer a new approach to maintaining clean, safe and healthy environments. Our scrubbing innovations like ec-H2O NanoClean™ and FaST® technologies provide the ideal solution for your specific cleaning needs.

- Electrically Converted Water

ec-H2O NanoClean™ technology electrically converted water is created by an on-board e-cell that generates millions of very tiny microscopic bubbles known as nanobubbles that promote the cleaning efficacy of the solution.

This next generation solution offers the same great benefits of the first generation and now cleans better and cleans more soils in more applications. The name NanoClean, refers to the generation of nano-scale bubbles that are an important part of the cleaning mechanism.

- The Safe Scrubbing Alternative®

FaST - Foam Scrubbing Technology uses up to 70% less water and 90% less chemicals and improves floor traction as certified by NFSI, helping reduce the risk of slip and fall accidents

Green Seal certified
Nobles MP and MPD detergents are Green Seal certified.

With FaST® technology you get...
No chemical residue, no chemical handling, and less waste.

Best of all, with FaST you get "up to 3 times longer" productive scrubbing.
