Our Sustainable Story

Command Packaging's Encore Recycling facility enables a continuous loop of sustainable plastic supply. Some of the largest multi-national and recognizable names such as, Red Blossom Strawberries, Dole, Gold Farms, Ramco, as well as many independent growers, are working with Encore Recycling center to ensure that the plastic used to protect our crops is collected and recycled. We put as much of this recycled material in the production of our bags as we can.

Command Packaging's Encore Recycling diverts over 100 million pounds of California's agricultural plastic away from landfills to make sustainable grocery bags, retail shopping bags and restaurant bags. The carryout bags are fully recyclable - essentially creating a continuous loop of sustainable plastic supply that need not ever see a landfill.

smarterbags *meet reusable bag requirements:*

- Reusable bag, designed for at least 125 uses
- 100% sourced and manufactured in the USA
- Made with a minimum of 20% Encore® certified PCR
- 100% recyclable

smarterbags *difference:*

smarterbags are the result of a truly sustainable approach to recycling farming plastic. Before their development, farming plastic ended its lifecycle in landfills, about 100 million lbs. a year in California alone.

smarterbags offer grocers a low-cost sustainable solution with the first US made grocery bag developed from Encore® recycled farming plastic. From farm to grocery store, it's closed loop recycling at its best.

Create your ultimate walking billboard
800.996.BAGS (2247)

Products bearing the Encore® trade name have been produced in the USA with non-toxic recycled materials. The following Encore® environmental features will help you save on your cost and the environment.

RECYCLED PLASTIC REDUCES YOUR CARBON FOOTPRINT

Through Command's Encore® Recycling Center, we divert millions of plastic from landfills into useful product solutions with the lowest carbon footprint. Choose from a minimum of 25% to 50% recycled material content (based on market availability).

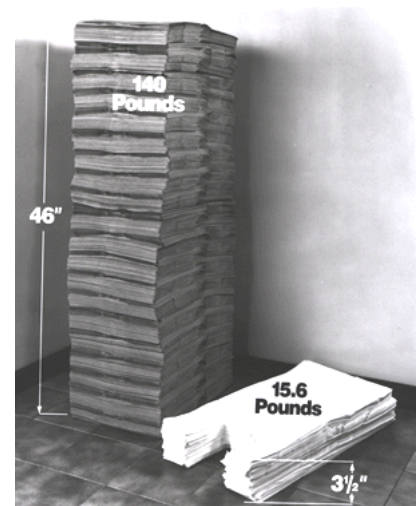

REUSABLE GAUGE MEETS BAG BANS:

- 100% recyclable and available in 2.25 - 4 mil gauges to meet reusable bag thickness requirements
- Tested for over 200 reuses with over 20 lbs (may vary with size and gauge)
- Certified by independent California State Approved lab

ENVIRONMENTAL DIFFERENCE

4 paper bags = 1 plastic bag

(reduced weight = reduced shipping and storage costs)

Create your sustainable walking billboard
