## MOP BASICS – Scrubble® Products offers a wide variety of yarns to help you achieve your specific mopping needs more efficiently. The following information should assist you in selecting which mops are right for you.

### YARN

The variety of mops is large because certain yarns are designed for a specific task. It's important to understand that selecting the proper yarn will enable you to achieve maximum efficiency.

### CUT-END

These mops are more economical at purchase; however, cut-ends tend to fray, lint and unravel with steady use. This condition will lead to increased mop replacement. (Non-laundable)

### LOOP-END

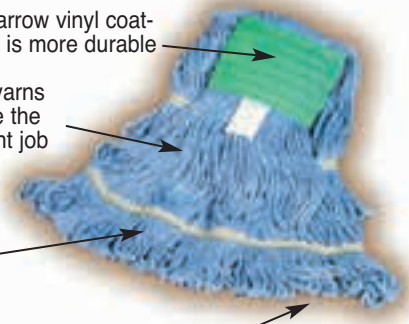

The loop-end mop performs more efficiently by resisting tangles without linting and fraying. These mops stand up to heavy use. Sewn-in tailband provides wide surface coverage without gaps.

5" wide or 1-1/4" narrow vinyl coated mesh headband is more durable

A variety of quality yarns allow you to choose the right mop for the right job

Multi-Sewn, color-coded tailband provides wide surface coverage without gaps

Loop-Ends keep yarn from tangling, fraying and linting

YARN	ADVANTAGES	DISADVANTAGES	APPLICATIONS
COTTON	Good absorption and retention. Low initial cost.	Needs to be broken in. Lints and is slow drying.	General Use
BLENDS	Ideal choice for performance, durability and price. Synthetic fibers add color.	May shrink over time.	Professionals who require a better, more durable mop.
SYNTHETIC	Synthetic yarn fights bacteria, mold and mildew while providing superior strength.	Higher cost. Not as absorbent.	Clean rooms & rough surfaces.
RAYON	Quick absorption & release. Dries fast, is mildew resistant and lints less.	Less liquid retention.	Applying liquids for finishes and disinfectants.

# CYCLONE® FloorCare

ACS Products manufactures a complete line of Floor Maintenance Pads for stripping, buffing, cleaning, polishing and high-speed burnishing. Our floor pads are formulated with the proper amount of non-woven polyester and abrasive grains to achieve maximum product performance. The bonding process of these fibers blended together with our special resins and adhesives make these floor pads tough, durable and consistent. All conventional and UHS pads are 1" nominal thickness. Our stripping pads are 7/8" thick and our Emerald Hy-Pro is 5/8" .

Least Aggressive

## TYPE 31 • *Aqua Burnishing UHS*

A UHS pad that lightly polishes softer floor finishes. This pad is thick and soft. Ideal for top dressing to a reflective gloss. Use with machines up to 3000 RPM.

## TYPE 52 • *Blue Velvet UHS Soft*

Removes black marks without removing the finish. Achieves a higher gloss level in heavy traffic areas. The UHS pad will yield more time between recoatings. Use with machines up to 3000 RPM.

NEW

## TYPE 36 • *Pink Burnishing Eraser*

This UHS pad is designed to restore finish and improve gloss on harder floor surfaces. Removes marks and scuffs quickly. Excellent durability and minimal finish removal. Use with machines up to 3000 RPM.

## TYPE 42 • *Beige Poly Thermal UHS*

Designed to stand up to the high heat and strength required with propane burnishing. This pad produces a very high gloss finish. Performs well on soft to medium surfaces. Use with machines up to 3000 RPM.

## TYPE 33 • *Natural Blend Light*

A controlled blend of polyester and natural hair fibers makes this a versatile UHS pad. The lubricating effect of natural hair produces the wet look **with soft finishes** while providing strength and durability. Use with machines up to 3000 RPM.

## TYPE 35 • *Natural Hair Blend Medium*

This is an aggressive burnishing pad that combines a heavy blend of natural hair with the proper amount of synthetic fiber. **Best suited for medium to hard finishes** with speeds of 1500 to 3000 RPM.

## TYPE 37 • *Natural Hair Blend Heavy*

This is the most aggressive burnishing pad available. The ideal combination of natural hair and synthetic fiber to provide a wet-look shine. **Best suited for hard finishes** with speeds up to 3000 RPM.

## TYPE 45 • *Peach Burnishing HS Auto Scrub*

An aggressive open weave pad that is soft and thick. Designed to work with all types of floor finishes. It allows wax dust to be absorbed up inside the pad and not be spread around the floor surface. Can be used as an ideal Auto Scrubber Pad, daily HS work or spray buffing up to 1500 RPM.

NEW

Most Aggressive

### TYPE 41 • *White Polishing*

This popular extra fine pad is formulated for polishing clean, dry floors. A fine water mist is used to produce a high gloss wet look. This thick pad is ideal for polishing soft waves on wood floors. Use with 350 – 800 RPM machines.

### TYPE 34 • *Tan Buffer*

The perfect pad for light cleaning and dry buffing. Removes scuffs and black heel marks while producing a high gloss shine. Use with 350 – 800 RPM machines.

### TYPE 51 • *Red Buffing*

Restores gloss while removing scuff marks and dirt on medium traffic areas. Can be used dry or spray buffing to produce a sparkling shine. Ideal for automatic scrubbing. Use with 350 – 800 RPM machines.

### TYPE 53 • *Blue Cleaner*

This pad is designed for wet scrubbing or medium-duty spray cleaning. Removes heavy dirt and scuff marks on most floor surfaces. This pad will remove the top layer of floor finish. Use with 175 – 300 RPM machines.

### TYPE 55 • *Green Scrubber*

Our toughest duty, most aggressive scrubbing pad for heavily soiled areas. Best when used for wet scrubbing or light stripping. Very durable and long-lasting. Use with 175 – 300 RPM machines.

### TYPE 71 • *Brown Strip*

A very strong pad for wet or dry stripping applications. Quickly removes wax, dirt and old finish leaving surface ready for immediate recoating. Use with 175 – 300 RPM machines.

### TYPE 72 • *Black Strip*

Our most popular stripping pad designed for heavy-duty wet stripping. Very aggressive texture to remove wax, dirt and any finish. Tough, durable and built to perform. Use with 175 – 300 RPM machines.

### TYPE 75 • *Midnight Blue Super Strip*

Highly abrasive and tear resistant with heavy duty stripping power. Unique fiber blend for long lasting durability. Open weave design allows for flow through without build up and loading. Pads are 5/8" thick. Use with 175 – 300 RPM machines.

### TYPE 73 • *Emerald Hy-Pro Strip*

Maximum abrasive content, tear resistant and long wearing. Wide open mesh construction allows solutions to flow through without loading and build up. Highly aggressive, 5/8" thick is the toughest of them all. Use with 175 – 300 RPM machines.

### TYPE 47 • *Maroon Thin Line Conditioning/Strip*

This general purpose conditioning pad is designed for stripping, cleaning and general surface conditioning. Best suited for between coats finishing of wood floor surfaces. Thin Line pads are 3/8" thick and are packed 10 per case. Use with 175-300 RPM machines.

Effective use of Diamond Floor Pads for your floor maintenance requires utilizing standard industry cleaning methods and equipment. Always scrub the floor first to clean dirt and debris from the surface and scrape gum or other materials from the floor. Use the proper equipment and speeds as prescribed when using Diamond Floor Pads. Run the appropriate Grit pad size 6-8 passes over surface for optimal performance. Clean the floor surface in between Grit levels for best results beginning with a clean surface for the next level of Grit. For the best results and maximum performance and longevity, always use Diamond Floor Pads on clean, wet surface.

## Durable Sandscreen Disks

**ACS** Products sandscreen disks are used with conventional floor machines for fast action wood floor refinishing. Sandscreen is the perfect choice for sanding down the old finish prior to application of new finish. The scour method of floor refinishing is most often used on gym floors. The durable, open weave construction is non-loading.

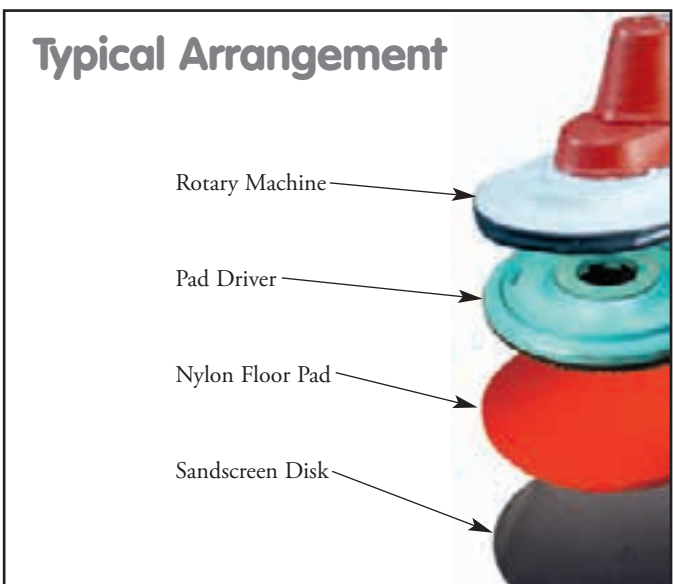

**ACS** Products sandscreen disks are manufactured with water-proof resins & silicon carbide abrasives on both sides making them highly consistent and longest-lasting.
