The Importance of Matting

Just like in the game of American football—“the best defense is a good offense” especially when it comes to floor maintenance. The ideal method to keep dirt, grime and moisture out of the building begins with a well-organized floor matting system. The cost to remove dirt from a building far exceeds the cost to prevent it from coming in. In fact, 80% of the soil in a building comes in on the feet of patrons entering the facility. It is estimated that it can cost up to \$600 to remove just one pound

of dirt after it’s been tracked throughout a building. If 1,000 people entered into a facility during one month, that could be the sum of 25 pounds of dirt, totaling up to \$15,000 per month!

A matting system reduces dust and dirt brought in through entryways, therefore decreasing associated costs with air filtration, vacuuming and cleaning, not to mention eliminating the wear and tear on interior floors.

Buying vs. Renting Floor and Entrance Mats

When it comes to matting for the office or businesses, consumers have two choices: buying or renting. Although renting might sound like a good option, rental floor mats can actually end up costing far more than purchased mats. Some factors worth consideration include:

Maintenance — Most businesses already have their floors cleaned daily and this is enough to maintain floor mats as well. Furthermore, business owners must clean rental mats if they become soiled in between scheduled pickup times. Rental companies also do not launder or replace anti-fatigue, kitchen or scraper mats, so businesses must incur the cost of cleaning those mats, in addition to paying the rental fee.

Quality and Appearance — Rental companies provide floor mats in limited styles and colors, which may

result in having to select a mat that is not a good fit for a business’ space or décor. Rental companies may reuse mats for years, leaving renters with inconsistent quality.

Eco-Friendly — When factoring in the fuel used to pick up mats for laundering and returning them, plus the water and chemicals used in cleaning them, rental mats have a significantly larger environmental impact than purchased mats.

Cost — This is the biggest consideration when planning for floor matting. For example renting a 3’ x 5’ floor mat for five years can cost almost 10 times the amount of purchasing just one mat. Entrance and floor mats are one of the first items people notice when they step into a facility, so the quality and appearance of these mats are vital to making a good first impression.

A Comprehensive Matting System

Americo offers a comprehensive matting system to prevent dirt from ever reaching the interior of a building; support a safer working environment; and promote a company’s brand.

SCRAPER OUTDOOR

Scraper mats are pre-entry mats and are created to aggressively scrape off and trap heavy soil, snow, ice and other large debris at the base of the mat.

SCRAPER/WIPER INDOOR/OUTDOOR

Scraper/Wiper mats are designed to provide additional scraping action, while wiping away finer dirt and moisture prior to stepping onto the interior floor.

WIPER INDOOR

Wiper mats continue to wipe away moisture and dust, and are ideal to utilize in combination with a scraper/wiper mat.

ANTI-FATIGUE INDOOR

Anti-fatigue mats provide a safe working environment while increasing productivity, muscle stimulation and blood flow.

FOOD SERVICE INDOOR

Slip resistant, food service mats assist in offering safe working areas for employees or anyone in facilities where grease or moisture can be found (i.e. kitchens, locker rooms, saunas or any other areas that may require flow through matting).

SPECIALTY INDOOR

Americo offers specialty matting ideal for reducing noise, while protecting floors (i.e. gym floors or bleachers).

LOGO MATS

Custom mats serve double-duty since they keep floors clean and safe, as well as promote name recognition and brand awareness! Custom Floor Mats break through the clutter and get noticed.

Put Americo Mats to Work for You!

First Impression

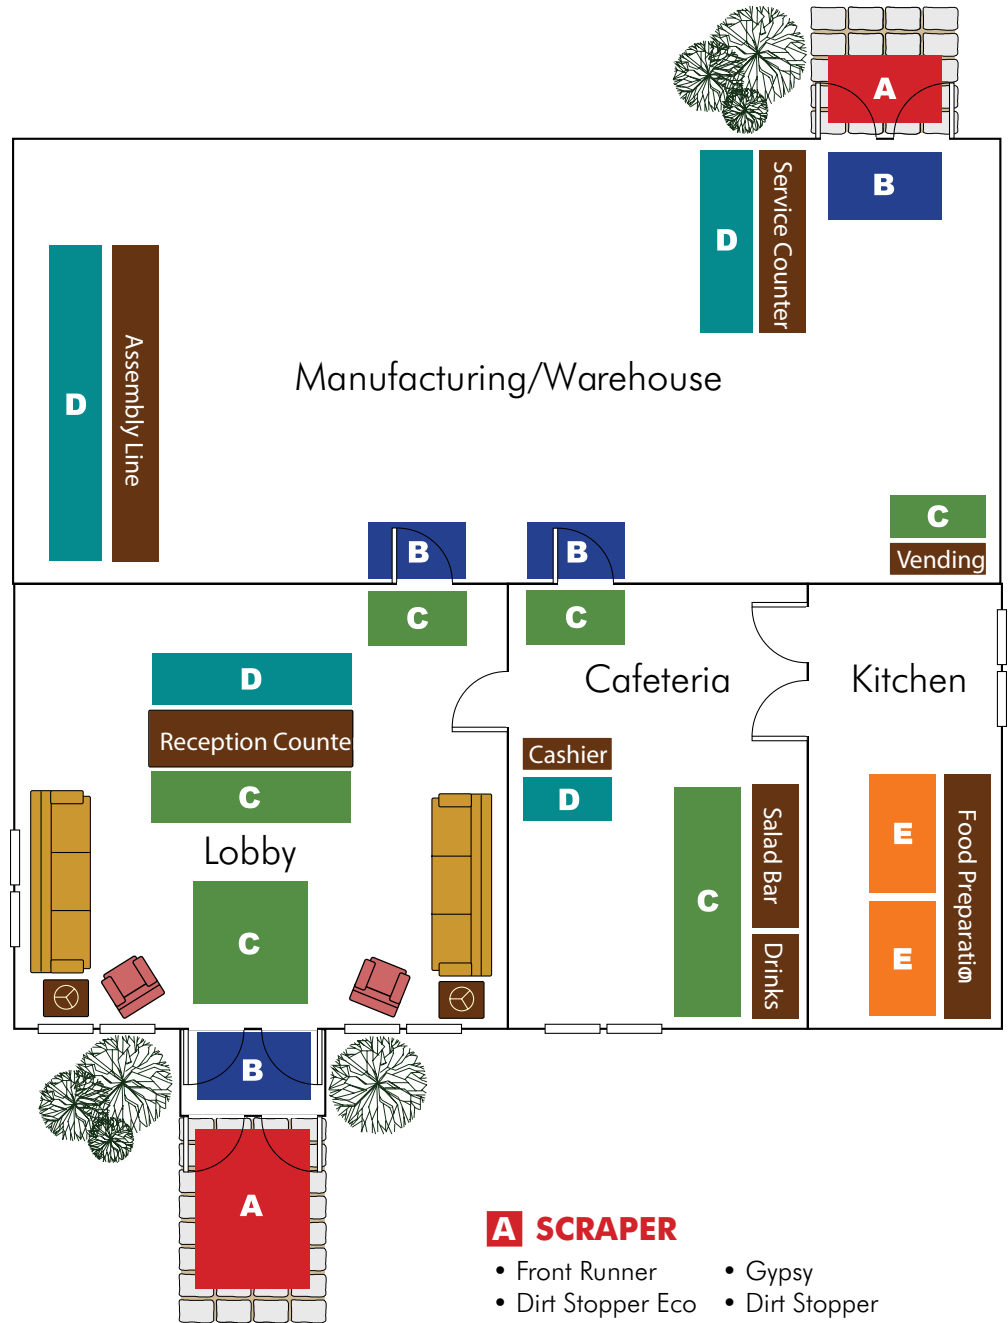

- Attractive floor matting enhances any entrance.
- Logo mats with corporate names, slogans or safety reminders are a welcome addition to any place of business.

Protect Floors

- Stop dirt, sand, water and snow at the door.
- Stopping dirt at the door reduces wear and deterioration of interior floors.
- Well placed floor mats reduce routine maintenance costs.

Promote Safety

- Outdoor mats help prevent snow, water and other debris from being tracked indoors.
- Indoor mats absorb moisture - keeping hard floor surfaces dry and slip resistant.
- Anti-fatigue mats add comfort and reduce workers' fatigue.
- Kitchen mats provide a slip resistant surface while promoting anti-fatigue qualities for workers.

Suggested Floor Mat Placement

Americo has a wide range of mat styles and colors for both indoor and outdoor use. Here are just a few examples of how you can put Americo mats to work for you.

SCRAPER OUTDOOR

 Proudly made in the U.S.A.

The Front Runner mat is constructed of a vinyl covered, nylon looped surface which is laminated to a rugged vinyl backing. Front Runner is the ideal entrance mat where dirt, sand, snow, and water are trapped beneath the mat's surface and stay hidden until cleaned. It is your first line of defense against grit accumulation and floor deterioration.

- Ideal Scraper Mat
- Long Lasting

Application:

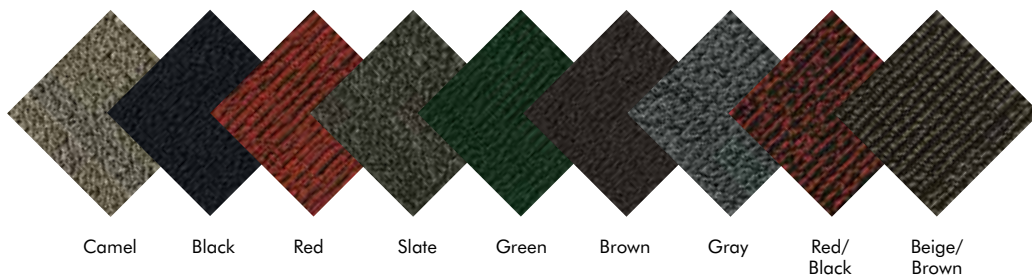

Front Runner matting is ideal for heavy traffic in indoor or outdoor entryways. Excellent for commercial establishments, retail, industrial entrances, or anywhere moisture and dirt can be tracked inside.

Proud to be Green

We are proud to contribute to our customers' sustainable position by supplying environmentally friendly products. Americo has proved itself as a leader in "green" manufacturing and a true pioneer in Jan/San markets worldwide. Our goal is to produce products that perform to the highest standards while leaving the smallest possible impact on the earth. Products such as Americo's Dirt Stopper Eco, Aqua Dam Eco and SureStep are all made from recycled material. For example, Dirt Stopper Eco is made from 95% post-consumer recycled tires. While the floor mat carpet in Americo's Aqua Dam Eco is constructed entirely out of PET fiber—which comes from recycled soda and water bottles. Consumers have access to high quality products with long lasting performance — while reducing mankind's impact on the environment.

Dirt Stopper Eco

EARTH FRIENDLY
MADE FROM RECYCLED TIRES

Made from 95%
post-consumer recycled tires.

See page 8

Aqua Dam ECO

100% of the surface material used in manufacturing these mats comes from recycled PET fiber sources. The base is constructed of recycled rubber.

See page 13

SureStep

The rubber backing on the SureStep mat is made from 20% recycled material.

See pages 17 and 26

Americo, manufacturer of quality floor matting, floor pads and cleaning accessories since 1969
