For our customer's convenience, SQP offers two delivery options for custom size and/or special print products. Produce & ship the production run all at once. Either the minimum run quantity or any greater amount on the Purchase Order. SQP will produce the minimum production run or any pre-determined quantity for the customer and inventory the product. A stocking agreement would be required for this option. When a PO is placed the customer may order any number of cases from this floor stock. However the total order must meet SQP minimums in order to qualify for prepaid freight otherwise the customer is responsible for all freight charges.

Thank you for your support as we strive to continually improve our product line offerings, printing capabilities, and overall service. Should you have any further questions please contact your Sales or Customer Service Representative
