Helping You Manage for A Healthy Environment

- ✓ Reduce Cost
- ✓ Increase Productivity
- ✓ Document Results

Providing Quality Maintenance and Chemical Specialty Solutions with Unparalleled Customer Service

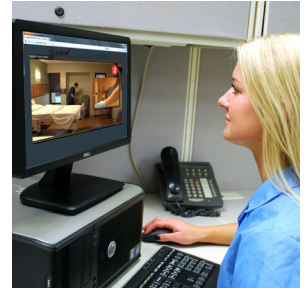

Healthcare

Helping you provide a documented, safe and clean environment.

Healthcare studies indicate the effectiveness of training diminishes after 90 days.

Clean✓®

- Web-based, multi-lingual initial and on-going education
- Provides exam-supported training certification for compliance with government regulations
- Documented component for risk management

Joint Commission requires a quality assurance inspection program.

CompuClean®

- Personalized performance tracking
- Workloading
- Facility-specific Clean✓ procedure cards
- Verified cleaning effectiveness for HCAHPS

The CDC recommends specific tools to validate your cleaning effectiveness.

UV✓™

- Optical brightener loaded, disposable swab and a black light to verify your cleaning and education effectiveness
- Evidence-based accountability
- A training tool that validates cleaning procedures to significantly reduce HAIs

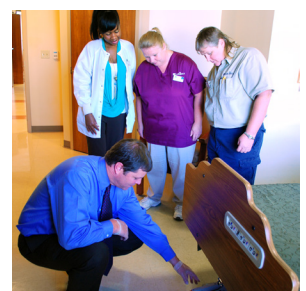

ATP Bioluminescence

- Swab and meter that validates your cleaning effectiveness
- Prevent HAIs with single pass measurable cleaning validation tool

The CDC recognizes that personnel are critical to HAI prevention

Inservice Training

- Training at your facility to guide and ensure the success of your cleaning processes
- On-site review and solutions to new and problematic maintenance needs

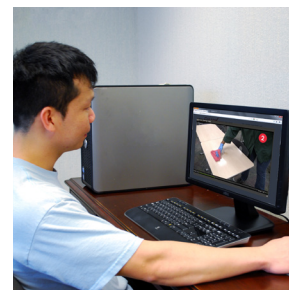

Education

Helping you provide a documented safe and clean environment allowing you to reduce unplanned spends.

Clean✓®

- Multi-lingual, web-based video training to reduce costs and increase productivity
- Provides certification
- Incorporates OSHA Hazard Communications and Bloodborne Pathogen training modules
- Step-by-step procedures for the healthy cleaning of your facility

CompuClean®

- Workloading to efficiently allocate FTE
- Improve cleaning efficiencies by documenting productivity standards
- Locate equipment and track maintenance history
- Standardize cleaning processes
- Facility-specific training cards

UV✓™

- Optical brightener loaded, disposable swab and a black light to validate your cleaning and education effectiveness
- Verify cleaning effectiveness of high touch points in restrooms and areas prone to bacterial contamination
- Evidence-based accountability
- Training tool that validates cleaning procedures to reduce the spread of infection

ATP Bioluminescence

- Swab and meter that validates your cleaning effectiveness
- Rapidly measure to ensure the cleanliness of the surfaces our children are routinely contacting

Inservice Training

- Training at your facility to guide and ensure the success of your cleaning processes

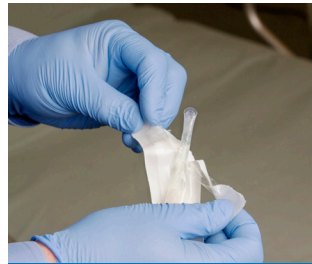

Spartan's Health Check Program Meets the Requirement for the Cleaning Industry Management Standard.

Quick and easy steps to use UV[✓]TM and the ATP meter.

1. Snap Swab

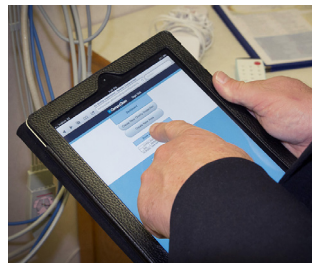

2. Tear Open Pouch

3. Mark Surfaces

4. Inspect Marked Surfaces After Cleaning

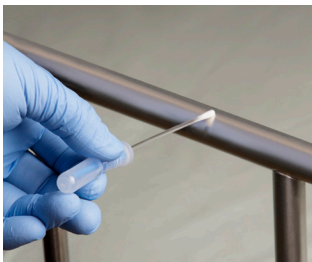

5. Record Results

ATP

1. Turn On and Allow Meter to Calibrate

2. Swab Surface

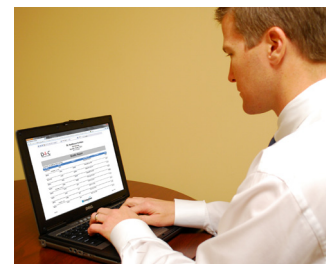

3. Snap Swab Tip & Squeeze

4. Place in ATP Meter & Press "OK" Button

5. Read Results

6. Review Data
