# WE UNDERSTAND PRINTING

## PRINTING APPLICATION

We have world-class printing equipment. For plastic cups and containers we have two 6-color Van Dam printing machines. For paper cups and containers, we have three German printing machines that print up to 5 colors.

## PRINTING SERVICE

We manage all designs and print services in-house. We can recreate or modify your existing artwork or our designers can help you develop an entirely new brand concept. We can even create mock-ups so that you can see what the actual product will look like once art work is finalized.

# WE'RE HERE TO HELP

## Whatever Your Printing Needs

# 5 STEPS

## Simple And Easy !

01

Choose the cup or container size(s) you need. We offer a wide range of sizes on paper cold cups, paper hot cups—single or double wall, paper food containers, PET drink cups, PET & PP round deli containers and PLA drink cups.

Choose up to 6-colors for your plastic cups / containers, 5-colors for your paper cups and containers and up to 4 colors for your customized PLA drink cups and cup sleeves.

03

Send us your artwork as an AI (Adobe Illustrator), EPS (Encapsulated PostScript) or PDF file. If your cup or container and we will recreate the artwork by hand.

# UNDERSTANDING PRINTING METHODS

Cyan  
Magenta  
Yellow  
Black

## 4-COLOR PROCESS PRINTING

Process printing refers to a process that uses 4 colors - Cyan (C), Magenta (M), Yellow (Y) and Black (B) to reproduce a wide range of colors by mixing the colors together as they are printed. This is known as CMYK process printing or 4-color process printing. A wide range of colors can be created with just 4 color printing plates so the number of reproducible colors is much higher than four. PANTONE® color codes can be provided as a final color reference, but not all PANTONE® colors can be reproduced.

## SPOT COLOR PRINTING

Spot color printing uses a color system of solid, pre-mixed colors, also known as PANTONE® colors. Spot colors are more accurate as you have already determined the color by its specific PANTONE® number. It is generally more economical if printing is kept to 3-colors or less. Due to the use of food-grade inks, not all PANTONE® colors can be achieved. Also, spot colors are nearly impossible to replicate exactly on digital print devices such as color laser printers. Please note that the same color may appear differently on different raw materials.

Sample below of an apple separated into the four CMYK plates:

# PRINTING INFORMATION & DISCLAIMERS

## COLOR ACCURACY

When a PANTONE® color code is provided, finished products are expected to be within 2 PANTONE® colors, either up or down (refer to PANTONE® Solid color book). Due to food grade inks, not all PANTONE® color codes can be achieved, and any possible replacements is only at the manufacturer's discretion.

## INK ODOR

As a result of printing with food grade inks, a degree of ink odor should be expected in all custom printed products. Any possible replacement is only at the manufacturer's discretion.

## PRINTING PLATE CHARGES

Printing Plate charges will not be charged for reprint orders provided the existing plates are in good condition. If left unused, printing plates have a maximum life of 18 months. With the exception of double wall paper hot cups, printing plates charges may be waived if customer switches existing print to us. Customers will be notified if new plates will be necessary for their re-print orders and subsequently billed for the new plates.

## MINIMUM & LEAD TIMES

- All stated minimums apply for each and/or design ordered. Minimums are subject to change at any time. Due to the nature of custom printed products, there may be a +/- 10% over/under run (variance between amount ordered and amount produced).
- Lead times are estimated and are not guaranteed.

## PRINT GAP

A 1/4" gap is left between the leading edge of the design PET/PLA cups so that the design does not overlap.

In certain Native American dialects,  
KODA means "Friend".

Is there any better way to deepen friendships  
than over good food and drink? Choose Koda,  
your "friend" in foodservice disposables.
