

CLEAN

Training System

An effective training system instills pride and professionalism. It also saves money through less turnover, fewer complaints and a reduction in rework. By the time they receive their Clean✓ Certification, employees will have confidence in their work.

✓ YOU GET IT ALL WITH ONLINE TRAINING

The Ultimate Business Tool

The perfect training tool... available via most internet browsers. Employees and administrators (i.e. facility manager or site supervisor) can log in with established user name and password.

Employees can view videos, view and print training cards, view and print relevant training manual sections, and take tests for each module online. Even better, their activities are logged for administrators to review. Once they pass the tests, the facility administrator can print their certificates right from the website.

ISSA CIMS These technical training tools meet the requirements for the CIMS-Green Building Standard.

✓ VISUALIZE WITH VIDEO

Use the Clean✓ DVD or Online Video Series to illustrate correct cleaning procedures. The video presentations follow the procedure training cards, so it's a good idea to have the cards at hand when your staff is in initial training. Employees can then immediately relate to the images on the videos and cards. Take interaction one step further... let employees check the steps of each procedure as the steps are completed in the DVD. This is a great way to encourage audience participation and reinforce learning.

✓ TRAINER MANUAL

Use the Clean✓ Trainer Manual to thoroughly know both cleaning procedures and the reasoning behind them. Safety, Spartan Support, Product Information and Training Tips are also included in this complete guide. For detailed hand-outs, trainers can simply pull out the "How to Clean" pages, copy and distribute. Images and product category numbers match the training cards.

✓ ON-THE-JOB CARD COLLECTION

Universal Images, Product Coding, Safety and proven cleaning procedures are superbly aligned with the video training on Restroom, Classroom, Office, Carpet, Hard Floor Care, Health Care and Safety segments. The Clean✓ cards allow employees to perform each cleaning step with confidence when they're ready to clean by themselves. Employees simply check off each step as it's completed with Spartan's unique erasable pen. The job gets done right and your employee's maintain professional standards.

Dual rings allow separation of the areas and customization of the card sets. Pull out cards you don't need or separate the set with different employees.

Safety is always top priority. Personal Protective Equipment is reinforced with each procedure card and Safety Cards offer more detailed product safety information.

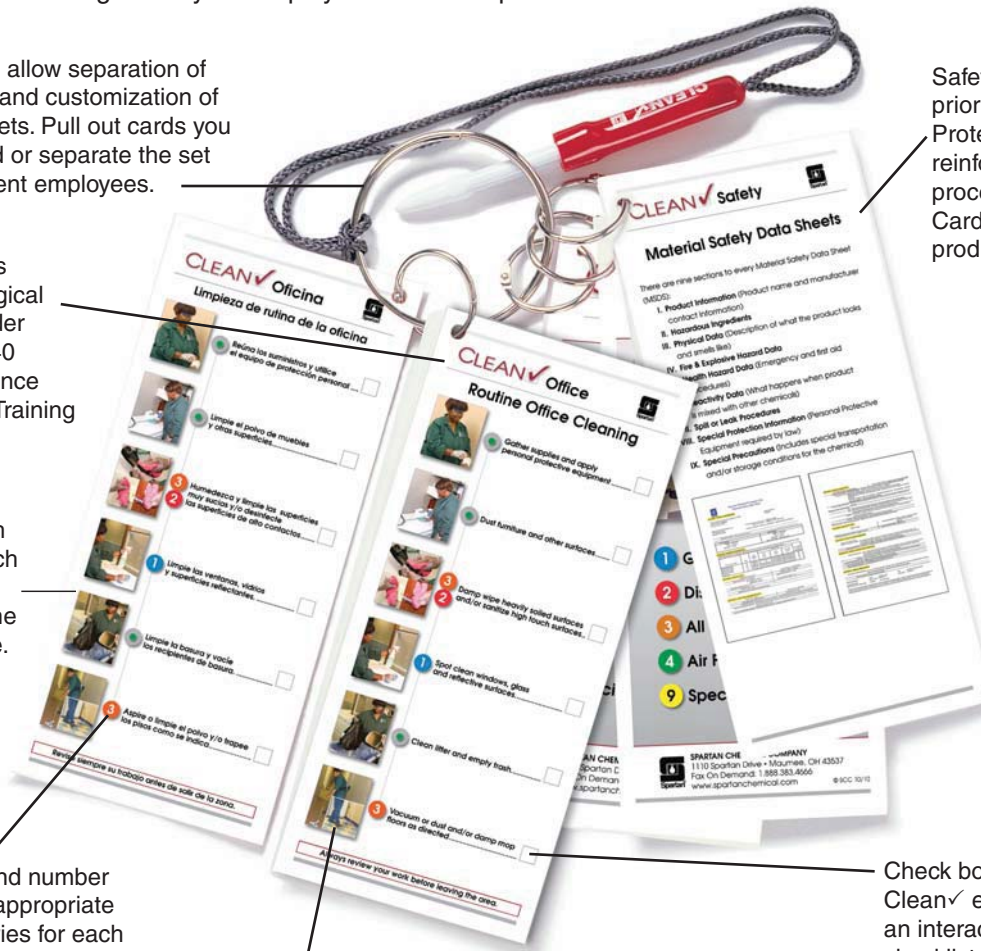

Procedure cards progress in a logical step-by-step order based on over 40 years of experience from Spartan's Training Department.

Complete Spanish on the back of each card make this system ideal for the diverse work force.

Product color and number coding refer to appropriate product categories for each step of every procedure.

Images are a universal language. When used with online and video based training, the repetition of the images reminds employees of the proper steps to perform in the correct order for effective cleaning.

Check boxes and the unique Clean✓ erasable pen provide an interactive training checklist that allows employees to ensure every step is completed. Supervisors also benefit by using this for a quality check.

✓ TESTING AND CERTIFICATION

When training is complete, show your pride in employees for a job well done. Simple tests and attractive Certificates for each area are included with the complete system. Online testing is available and will provide trackable results for each employee. Test questions are kept as basic as possible to encourage professionalism, success and pride. Present the Certificates with enthusiasm. Employees will appreciate it and take great pride in their work.

CLEAN

Training System

The Complete Clean✓ Training System
