

December 2, 2025

Dear Valued Client,

IPC Eagle will be implementing a price adjustment effective January 19, 2026.

Ongoing changes in labor, freight, and material costs require adjustments to select equipment platforms, parts, and consumables. We continue to absorb a portion of these increases, but we are unable to offset the full impact across all categories.

List prices will rise an average of 3.8%, but many items are seeing stable or improving costs, resulting in flat pricing or even reductions.

Updated price lists will be finalized and shared one week prior to the effective date. If you have any questions or do not receive the updated file, please contact your Customer Service Representative or Regional Sales Manager.

Thank you for your continued partnership.

Best Regards,

Don Andrews

President, IPC Eagle
